## Reduce Asthma & Allergy “Triggers”

There is NOTHING more frustrating than watching your child or loved one struggle to breath. FINALLY, we now have the technology to help control and even eliminate the TRIGGERS in your home, car or business.

Doctors advise their Asthma and Allergy Patients that, **“they need to try and make changes to the environment that they live and work in, to alleviate these TRIGGERS, which lead to respiratory problems.”**

Years of research and development have lead to the production of a machine, which will **seek out and destroy** these triggers within your home, automobile, office etc. **O<sup>3</sup> Wizard’s** Patent Pending Sanitization Process is designed to remove contaminates from the air, while cleaning the air at the same time.

Mold and most other contaminates require three things to live (Moisture, Temperature and Oxygen). If you remove any one of these items from the environment you will also remove the problem. Mold, mildew, dust mites, etc. will die, as will most other infectious bacteria (i.e. *Ecoli*, *Salmonella*, *Listeria*, *Staphylococcus aureus*, *Streptococcus pyogenes...to name a few*), leaving you something that you probably never really experienced.

**“CLEAN AIR!!!!!”**

**Control the Mold**

**Economically / Effectively / Efficiently / Environmentally**

**O<sup>3</sup> Wizard’s Mold Prevention Policy**

Money Back - Guaranteed  
(Periodic Sanitization)
